

Verification Statement

Purolator 2023 GHG Inventory

Purolator Inc. (Purolator) retained GHD Limited (GHD) to complete a verification of its 2023 greenhouse gas (GHG) emissions inventory. GHD understands that Purolator intends to use the emission figures to support its 2023 Corporate Sustainability Report. This Verification Statement was completed on May 3, 2024 and updated on May 9, 2024 and April 25, 2025 in compliance with the terms of reference in our agreement with Purolator dated April 25, 2025.

Type of Verification: Full
Organizational Boundary: Control: Operational
Geographical Scope of Verification: North American; Canada and United States of America

In accordance with our engagement with Purolator dated February 10, 2025 (the "contract") and for the avoidance of doubt, we confirm that our *Verification Report: 2023 GHG Emissions* incorporated the following matters:

1. Boundaries of the reporting company covered by the Assurance Report and any known exclusions*1:

Purolator operations assessed as part of this verification included Purolator's entire corporate operations, which includes all sources in which Purolator has majority ownership and operational control. The inventory boundary includes the Purolator direct mobile emissions (corporate on-road and off-road vehicles), direct stationary combustion (building heating), and indirect emissions due to electricity supply to Purolator corporate operations. Other indirect (Scope 3) emissions included in the inventory included purchased goods and services, capital goods, fuel and energy related activities, upstream transportation and distribution, waste generated in operations, business travel, and employee commuting. Verification is completed at the corporate level.

2. Emissions data verified - broken down by Scope 1, Scope 2, and Scope 3 categories with figures given; option to include other relevant data that has been verified with figures:

Total Entity-Wide Emissions Verified:
Scope 1 Emissions: 125,818 tonnes CO₂e
Scope 2 Emissions (Location-based): 5,686 tonnes CO₂e
Scope 2 Emissions (Market-based): 2,036 tonnes CO₂e
Scope 3 Emissions: 367,528 tonnes CO₂e consisting of:

- **Purchased goods and services:** 19,635 tonnes CO₂e
- **Capital goods:** 24,103 tonnes CO₂e
- **Fuel and energy related activities:** 82,935 tonnes CO₂e
- **Upstream transportation and distribution:** 216,404 tonnes CO₂e
- **Waste generated in operations:** 1,920 tonnes CO₂e
- **Business travel:** 1,241 tonnes CO₂e
- **Employee commuting:** 21,132 tonnes CO₂e
- **End-of-Life Treatment of Sold Products:** 157 tonnes CO₂e

*1 Optional field

3. Period covered (e.g., '12 months to DD MM YY'):

The reporting period is between 01/01/23 and 31/12/23.

4. Verification standard used:

For the verification of the 2023 GHG Emissions, GHD has applied ISO 14064-3 (2019).

5. Level of assurance:

Limited level of assurance

6. Assurance opinion (incl. level of assurance and any qualifications):

The GHG Protocol states, "as a rule of thumb, an error is considered to be materially misleading if its value exceeds 5 percent of the total inventory for the part of the organization being verified." Consistent with this, and industry practice, GHD established a quantitative materiality for this verification of ± 5 percent of the total reported GHG emissions. An individual error, misrepresentation, or a series of discrete errors, omissions, or misrepresentations or individual or a series of qualitative factors, when aggregated may be considered material.

- Net sum of all Scope 1 discrepancies: no discrepancies noted
- Net sum of all Scope 2 discrepancies: no discrepancies noted
- Net sum of all Scope 3 discrepancies: no discrepancies noted

The purpose of verification was to have an independent third party assess Purolator's 2023 GHG emissions data, calculations, and compliance with the requirements of ISO 14064-3, the *GHG Protocol*, and associated guidance. The objective of the verification was to provide Purolator with assurance that there are no material misstatements in the 2023 GHG emissions and that the information reported is accurate and consistent with the requirements of the *GHG Protocol*.

Based on our verification there is no evidence that the GHG statement is not materiality correct and is not a fair representation of GHG data and information and that it has not been prepared in accordance with applied standards and criteria on GHG quantification, monitoring and reporting.

7. Verification provider and accreditations (if relevant):

VERIFICATION BODY NAME: GHD Limited
VERIFICATION BODY ADDRESS: 455 Phillip Street, Unit #100A, Waterloo, Ontario, N2L 3X2
VERIFICATION BODY CONTACT: Mr. Gordon Reusing
TITLE: Principal
TELEPHONE: 519-340-4231
EMAIL: Gordon.Reusing@ghd.com

Accreditations: GHD is a Canadian based company accredited by the American National Standard Institute (ANSI) under ISO 14065 to provide organizational level verification services.

8. Lead verifier name and relevant accreditations/professional membership (if relevant):

LEAD VERIFIER:	Mr. Erik Martinez
TITLE:	Engineer
TELEPHONE:	519 340-4213
EMAIL:	Erik.Martinez@ghd.com

9. This letter should be prepared on the verifier's letterhead or include the signature of the lead verifier (or authorized signatory/organization responsible for issuing the Assurance Report/statement) in the box below:

 Erik Martinez, P. Eng.
